SUMMARY

Final-year B.Tech student specializing in Artificial Intelligence and Data Science, with hands-on experience building AI-powered applications using LLMs, FastAPI, and React. Passionate about solving real-world problems through intelligent systems and full-stack development. Actively seeking opportunities in AI engineering and software development roles.

TECHNICAL SKILLS

Languages: Python, Java, C, JavaScript

Frontend: React, Tailwind CSS

Backend: FastAPI, Node.js

AI / ML: OpenAI API, LangChain, HuggingFace Transformers

Tools & DevOps: Git, Docker

PROJECTS

Smart Support Env | *Python, FastAPI, HuggingFace, React*

2025 – Present

- Architected an AI-powered customer support triage system that automatically classifies incoming queries into Easy, Medium, and Hard priority tiers using OpenAI's language models.
- Designed and developed a RESTful backend with FastAPI and a responsive frontend with React.
- Automated query classification and routing to reduce manual triage effort.
- Integrated structured prompt pipelines using LangChain for improved accuracy.
- **GitHub Repository:** github.com/Dhanyachilakalapudi/smart-support-env

Smart AI Support Centers | *Python, Flask, OpenAI, Postman*

2025 – Present

- Currently designing and building an AI-based system targeting real-world automation use cases; full details to be published upon completion.
- Leveraging **HuggingFace Transformers** and agentic workflows to prototype a production-ready MVP.

ACHIEVEMENTS & COMPETITIONS

- **Meta Hackathon** – Advanced through **3 competitive rounds**, demonstrating strong problem-solving and product-thinking skills under time constraints.
- **Ideathon – 3rd Prize** at Andhra Loyola College, Vijayawada – Recognized for innovative concept development and presentation among competitive teams.
- **Google Developer Solution Challenge (2026)** – Participating; building a socially impactful solution aligned with UN Sustainable Development Goals using Google technologies.
- **Scalar Ascent Hackathon** – Actively competing in this multi-stage national-level hackathon focused on scalable tech solutions.

EDUCATION

Eluru College of Engineering and Technology, Eluru

Expected: 2027

Bachelor of Technology (B.Tech) in Artificial Intelligence & Data Science

CERTIFICATIONS

- **EduSkills – IoT Cloud Engineer Virtual Internship Certification** – Gained hands-on experience in IoT systems, cloud integration, device connectivity, and real-time data processing using industry tools and platforms.
